

SMART FUEL MANAGEMENT

The **SmartFill Gen 3** is a smart, scalable, and highly reliable turnkey fuel management solution. Engineered for absolute ease of use and professional trust, it allows businesses to store, track, and optimize fuel usage for peak efficiency in any environment.

FEATURE

DETAILS

Users	Unlimited user access via tags, key cards or access pins.
Transactions	Unlimited transactions saved to cloud.
Management	Real time with live tracking every 5-10 seconds.
Storage	Unlimited cloud storage with encrypted data.
Monitoring	24HR live monitoring of tanks, users, nozzles, & transactions.
Compatibility	Monitor any type of tank, size & pump system.
Integration	Advance API integration into any accounting system.

Key Capabilities

- ✓ **Secure Access:** Authorize transactions using RFID tags, proximity cards, or unique 4-digit PINs to mitigate fuel theft.
- ✓ **Mandatory Data Capture:** Automatically prompts drivers for vehicle IDs, odometer readings, or hour meters before dispensing fuel.
- ✓ **Total Awareness:** Gain 24/7 visibility of every liter delivered, pumped, and consumed.
- ✓ **Inventory Security:** Set automatic re-order levels to notify fleet managers and suppliers when reserves are low.

Intelligence & Reporting

Centralized

Reporting: Manage multiple depot stocks and remote sites from a single screen

Customizable

Exports: Generate reports in PDF, Excel, or CSV formats to track activity.

Behavioral

Analysis: Evaluate driver fueling behavior to identify & reduce waste.

Available online access for your data.
